PERGAMON International Journal of Mechanical Sciences 41 (1999) V–XII

International Journal of MECHANICAL SCIENCES

Contents of Volume 41

NUMBER 1

D. Z. Yankelevsky and O. Leibowitz	1	Punching shear in concrete slabs
O. G. McGee, J. W. Kim and A. W. Leissa	17	The influence of corner stress singularities on the vibration characteristics of rhombic plates with combinations of simply supported and free edges
W. Anwen	43	Axisymmetric and asymmetric postbuckling response and energy release rate of delaminated circular film
C. Y. Wang	59	Simply supported ell- and cross-shaped plates under uniform lateral load
A. P. Gupta and N. Sharma	71	Forced axisymmetric response of an annular plate or parabolically varying thickness
X. E. Guo and L. J. Gibson	85	Behavior of intact and damaged honeycombs: a finite element study
M. Ciuvarella, D. A. Hills and R. Moobola	107	Analysis of plane, rough contacts, subject to a shearing force
Calendar	I	
Announcements	V	

NUMBER 2

S.-J. Park, H. N. Han, K. H. Oh and D. N. Lee	121	Model for compaction of metal powders
W. G. Jiang, M. S. Yao and J. M. Walton	143	A concise finite element model for simple straight wire rope strand
M. A. Belouchrani and D. Weichert	163	An extension of the static shakedown theorem to inelastic cracked structures

M. D. White and N. Jones	179	Experimental quasi-static axial crushing of top-hat and double-hat thin-walled sections
M. D. White, N. Jones and W. Abramowicz	209	A theoretical analysis for the quasi-static axial crushing of top-hat and double-hat thin-walled sections
P.-H. Chen, H.-Y. Peng, H.-Y. Liu, S.-L. Chang, T.-I. Wu and C.-H. Cheng	235	Pressure response and droplet ejection of a piezoelectric inkjet printhead
Calender	I	
Announcements	V	

NUMBER 3

J. L. Duncan, S.-C. Ding and W.-L. Jiang	249	Moment–curvature measurement in thin sheet—part I: equipment
J. L. Duncan, S.-C. Ding and W.-L. Jiang	261	Moment–curvature measurement in thin sheet—part II: yielding and kinking in aged steel sheet
L. H. You and J. J. Zhang	269	Elastic-plastic stresses in a rotating solid disk
Y. Kimura and T. H. C. Childs	283	Surface asperity deformation under bulk plastic straining conditions
C. T. Loy, K. Y. Lam and J. N. Reddy	309	Vibration of functionally graded cylindrical shells
H. Ouyang, J. E. Mottershead, M. P. Cartmell and D. J. Brookfield	325	Friction-induced vibration of an elastic slider on a vibrating disc
R.-F. Fung, K.-W. Chen and J.-Y. Yen	337	Fuzzy sliding mode controlled slider–crank mechanism using a PM synchronous servo motor drive
M. T. Todinov	357	Maximum principal tensile stress and fatigue crack origin for compression springs
Calendar	I	
Announcements	V	

NUMBERS 4–5

Special Issue

Selected papers from:

MODERN PRACTICE IN STRESS AND VIBRATION ANALYSIS,
INSTITUTE OF PHYSICS CONFERENCE, UNIVERSITY COLLEGE, DUBLIN
3–5 September 1997

Editorial	371	
A. J. Hull	373	An inverse method to measure the breathing wave speed in a liquid-filled cylindrical shell
S. Ulaga, M. Ulbin and J. Flašker	385	Contact problems of gears using Overhauser splines
I. A. Jones	397	Analysis of laminated anisotropic plates and shells using symbolic computation
R. S. Hack and A. A. Becker	419	Frictional contact analysis under tangential loading using a local axes boundary element formulation
P. Ribeiro and M. Petyt	437	Nonlinear vibration of plates by the hierarchical finite element and continuation methods
O. Attia and A. El-Zafrany	461	A high-order shear element for nonlinear vibration analysis of composite layered plates and shells
L. Ramanan, R. Krishna Kumar and R. Sriraman	487	Thermo-mechanical finite element analysis of a rail wheel
K. Kelly, P. Young and G. Byrne	507	Modelling the influence of machining dynamics on surface topography in turning
J. M. Dulieu-Barton and S. Quinn	527	Thermoelastic stress analysis of oblique holes in flat plates
R. P. West and M. N. Pavlović	547	A parametric study of the clustering of modes in the vibration of partially embedded beams
H. J. Rice and P. Göransson	561	A dynamical model of light fibrous materials
M. D. Gilchrist	581	Attenuation of ultrasonic Rayleigh–Lamb waves by small horizontal defects in thin aluminium plates
Calendar	I	
Announcements	V	

NUMBER 6

D. C. Lagoudas and S. G. Shu	595	Residual deformation of active structures with SMA actuators
D.-K. Leu	621	Finite-element simulation of the lateral compression of aluminium tube between rigid plates
R. Jain, K. Ramachandra and K. R. Y. Simha	639	Rotating anisotropic disc of uniform strength
Z. C. Xi, L. H. Yam and T. P. Leung	649	Free vibration of a laminated composite shell of revolution: Effects of shear non-linearity
D. Z. Yankelevsky	663	Elastic–plastic behavior of a shallow two bar truss
W. Chen and H. Ding	677	Natural frequencies of fluid-filled transversely isotropic cylindrical shells
C. C. Chen, S. Kitipornchai, C. W. Lim and K. M. Liew	685	Free vibration of cantilevered symmetrically laminated thick trapezoidal plates
H.-C. Wu, H.-K. Hong and Y.-P. Shiao	703	Anisotropic plasticity with application to sheet metals
J. C. Choi, Y. Choi and S. J. Tak	725	The forging of helical gears (II): comparisons of the forging processes
W. Johnson	741	Early bridge consultants, Benjamin Robins, F. R. S. and Charles Hutton, F. R. S. and mis-judged bridge designer, Thomas Paine
Erratum	749	
Calendar	I	
Announcements	V	

NUMBER 7

D. Durban and Z. Zuckerman	751	Elastoplastic buckling of rectangular plates in biaxial compression/tension
C. Y. Cheung, A. C. F. Cocks and D. Cebon	767	Isolated contact model of an idealized asphalt mix

M. Perotti 793 Speed-up of a DFEM code for unsteady gas dynamics in pipes

Y. C. Jeon and K. T. Kim 815 Near-net-shape forming of 316L stainless steel powder under hot isostatic pressing

V. Zalizniak, Y. Tso and L. A. Wood 831 Waves transmission through plate and beam junctions

H.-S. Shen 845 Nonlinear bending of Reissner–Mindlin plates with free edges under transverse and in-plane loads and resting on elastic foundations

A. A. Singace 865 Axial crushing analysis of tubes deforming in the multi-lobe mode

Calendar I

Announcements V

NUMBER 8

A. Messina and K. P. Soldatos 891 Vibration of completely free composite plates and cylindrical shell panels by a higher-order theory

V. Yıldırım 919 An efficient numerical method for predicting the natural frequencies of cylindrical helical springs

Z.-C. Lin and Y.-Y. Lin 941 Fundamental modeling for oblique cutting by thermo-elastic-plastic FEM

A. G. Hanssen, M. Langseth and O. S. Hopperstad 967 Static crushing of square aluminium extrusions with aluminium foam filler

S. Santosa and T. Wierzbicki 995 Effect of an ultralight metal filler on the bending collapse behavior of thin-walled prismatic columns

W. Johnson 1021 The mismatch in service between Stringer Lawrence and Benjamin Robins in mid-18th century south-east India

Calendar I

Announcements V

NUMBER 9

B. Goes, J. Gil-Sevillano and U. D'Haene	1031	Modelling the evolution of residual stresses during tensile testing of elastoplastic wires subjected to a previous bending operation
N. El-Abbasi, J. S. Cirne and S. A. Meguid	1051	Numerical and experimental investigations of contact in thin and thick rings
P. Ulysse and R. E. Johnson	1067	A die design model for thin section extrusions
J.-B. Han and K. M. Liew	1089	Axisymmetric free vibration of thick annular plates
B. Chin, J. A. Nemes and S. Yue	1111	Influence of strain distribution on microstructure evolution during rod-rolling
I. Takewaki	1133	Hybrid inverse eigenmode problem for top-linked twin shear building models
W. Johnson	1155	Letter to the Editor
Calendar	I	

NUMBER 10

N. R. Chitkara and M. A. Bhutta	1159	Forging and heading of hollow spur gear forms: an analysis and some experiments
N. R. Chitkara and M. A. Butt	1191	Axi-symmetric tube extrusion through a smooth conical or cosine die and over a conical or ogival mandrel: numerical construction of axi-symmetric slip-line fields and associated velocity fields
S. H. Park, J. W. Yoon, D. Y. Yang and Y. H. Kim	1217	Optimum blank design in sheet metal forming by the deformation path iteration method
K. C. Hinge, A. M. Maniatty, M. Chen and K. Craig	1233	Axial velocity distribution imparted on thin media transported by layered rolls
A. D. Kerr and J. E. Cox	1253	Analysis and tests of bonded insulated rail joints subjected to vertical wheel loads

M. Jain, J. Allin and D. J. Lloyd 1273 Fracture limit prediction using ductile fracture criteria for forming of an automotive aluminum sheet

Calendar I

NUMBER 11

G. A. Mohr 1289 Finite element solutions for optimal triangular plates

Y.-L. Perng and J.-H. Chin 1301 Theoretical and experimental investigations on the spinning BTA deep-hole drill shafts containing fluids and subject to axial forces

L. S. Bayoumi 1323 Round-to-square section drawing through flat idle rolls

C. K. Chen and S. H. Ho 1339 Transverse vibration of a rotating twisted Timoshenko beam under axial loading using differential transform

J. G. Teng and H.-W. Ma 1357 Elastic buckling of ring-stiffened cone–cylinder intersections under internal pressure

H. El-Sobky and A. A. Singace 1385 Profiled polymer pipes as re-usable energy absorption elements

R. I. Nepershin 1401 Plane strain hot rolling of slab and strip

Calendar I

Announcement V

NUMBER 12

C. G. Kang and H. K. Jung 1423 Finite element analysis with deformation behavior modeling of globular microstructure in forming process of semi-solid materials

S. R. Turnbull and D. Dawson 1447 The dynamic behaviour of flexible semi-trailers on board Ro–Ro ship

M. Hua and Y. H. Lin 1461 Large deflection analysis of elastoplastic plate in steady continuous four-roll bending process

L.-H. Chen and S.-C. Huang	1485	Vibrations of a cylindrical shell with partially constrained layer damping (CLD) treatment
K. Komori	1499	Simulation of chevron crack formation and evolution in drawing
K. H. Low	1515	Comparisons of experimental and numerical frequencies for classical beams carrying a mass in-span
M. Ciavarella and G. Demelio	1533	On non-symmetrical plane contacts
Calendar	I
